Making
Connections
And Providing
Hope in
Difficult
Situations

All services
provided by
Egairo are without
charge to anyone

William needs to travel from Nebraska to Baltimore every two weeks for three months to have his femur lengthened because it doesn't grow by itself. He has this every two years as he grows up so that he can walk. Air transportation allows him and his mom to be at home with family rather than either spending the whole time in Baltimore, or spending seven days traveling in a car.

Helping others with our gift of flight

Give A Gallon!

When someone is diagnosed with a life-threatening disease, such as liver cancer or a brain tumor, there are a number of experienced treatment centers across the country capable of treating such time-sensitive conditions. But what if the patient requiring care doesn't live near the particular hospital or medical research facility that he or she desperately needs? What if the person is at a financial disadvantage?

The mission of Egairo, put simply, is to provide cost-free flights to those with special medical needs. Based at the Springfield-Beckley Municipal Airport in Springfield, Ohio, Egairo's planes have traveled to many locations fulfilling that very mission. Since we started flying in 1996, the all volunteer staff of this non-profit organization has helped many financially distressed individuals and families get to the treatment centers they need.

Many lives are touched by the service we provide. For those seeking a helping hand at a time of crisis, Egairo can be a critical resource. Each mission is screened by LifeLine Pilots and/or AngelFlight to verify legitimate need.

Each flight costs between \$500 and \$1000. **You can help!** For the equivalent of a fast food snack, a monthly donation of \$5.00 will help ensure the fuel we need to operate is available on a continual basis. Please consider pledging a monthly gift in any amount to help provide this crucial transportation. Your tax deductible contribution, in combination with the generosity of others, will make a large difference in our ability to help more people. Please take a moment to visit our website, and contact us for more information.

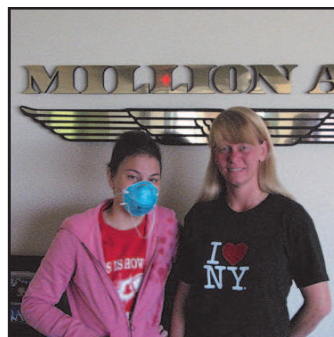

"Each one should use whatever gift he has received to serve others..."

Brittany needs to travel, with her mom, from her home in Oklahoma to Cincinnati regularly. She and her sister share a hereditary illness and are both being treated by the specialists in Cincinnati. The three often fly together. Private air transportation significantly reduces their risk of infection due to weakened immune systems.
